The Transcriptional Regulator RfaH Stimulates RNA Chain Synthesis after Recruitment to Elongation Complexes by the Exposed Nontemplate DNA Strand

In the April 19 issue of *Cell*, in the article by Artsimovitch and Landick (Volume 109, pp. 193–203), incorrect values were reported for %*RO** below the first two lanes of Figure 3 and for %*II** below lane 7 due to errors in figure preparation. The correct values are 57%, 57%, and 37%, respectively. The conclusions of this paper are unaffected by these corrections.

Irina Artsimovitch and Robert Landick
